Robert,

Attached is the general permit for all 23 oil rigs in federal waters off the coast of California. I have attached a map showing the locations of all the platforms, which are fixed to the ocean floor. I have also attached a photo of the Beta platforms—Elly and Ellen are connected by a bridge and Eureka can be seen in the distance. Lastly, I also attached an inspection report I completed last year for platforms Elly and Ellen (not Eureka) which may give you some more information about the company and platform operations.

Beta's website (<http://www.betaoffshore.com/>) has a bit more information about the company and the three rigs. The website states, "three oil platforms in federal waters, eleven miles off the coast of southern California."

Let me know if you have any questions.

Colby
